## Infectious Diseases

### Syllabus

Department **Multidisciplinary Clinical Training**

Curriculum Specialty 31.05.01 General Medicine

Qualification **General Practitioner**

Form of education **Full-time**

Total (in credits) **8**

Total academic hours 288

including:

Contact 164

Self-study 124

Control:

credit with an assessment, the 9th term

### Course outline in terms

Academic year (Term)	7 (4.1)		8 (4.2)		9 (5.1)		Total

The Syllabus is compiled by: *Lecturer, Kamka N.N.*

---

The Syllabus

## **Infectious Diseases**

Developed in accordance with Federal State Educational Standard:

Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on August 12, 2020 No. 988)

Based on the Curriculum:

31.05.01 GENERAL MEDICINE

Specialization: General Medicine

Approved by the Academic Council of Surgut State University, June 11, 2026, Record No. 5

The Syllabus was approved by the department

### **Multidisciplinary clinical training**

*Doctor of Medicine, Professor, Klimova N.V.*

## 1. COURSE OBJECTIVES

- 1.1 The **aim** of Infectious diseases course is the development of students' theoretical knowledge and the formation of skills to be further applied for: early diagnosis of infectious diseases in outpatient settings and in the hospital; a complex of therapeutic and preventive measures in the pre - hospital and hospital stages; diagnosis of emergency conditions and the provision of medical care to infectious patients in the pre-hospital and hospital stages.

## 2. COURSE OVERVIEW

Course code (in | B1.Б.37

### 2.1 **Assumed background:**

Chemistry  
Biochemistry  
Biology  
Normal physiology  
Microbiology, virology  
Adaptive and age-related physiology  
Foreign language  
Histology, embryology, cytology  
Psychology and pedagogy  
Philosophy  
Life safety  
History of medicine  
Latin language  
physical Culture and sport  
Image in the profession  
Medical informatics  
Russian language and culture of speech  
Physics, mathematics  
Otorhinolaryngology  
Pathological syndromes in clinical medicine  
Team sports  
general physical preparation  
Individual sports  
Intellectual sports  
Physiological basis of human adaptation in the North  
Hygiene  
Pathological anatomy  
Pharmacology  
Dentistry  
Human genetics

### 2.2 **Post requisites:**

Emergency Medicine  
Epidemiology  
Phthisiology  
Clinical pharmacology  
Medical rehabilitation  
Dermatovenereology  
Anesthesiology, resuscitation, intensive care  
Forensic Medicine  
Outpatient therapy

### 3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)

PC-1.1. Demonstrates knowledge of etiology, pathogenesis, diagnostic criteria (clinical - subjective, physical, laboratory, instrumental) determines the main pathological conditions, symptoms, syndromes of diseases in a patient and diagnoses nosological forms according to the International Statistical Classification of Diseases and Health-Related Problems, X - XI revisions.

PC-1.2. Performs differential diagnosis, assesses the prognosis (short-, medium- and long-term) of the course of the disease, and identifies complications of acute and complications of chronic diseases.

PC-2.1. Evaluates the condition of a patient requiring emergency or urgent medical care, diagnoses a life-threatening condition, including clinical death;

PC-3.1 Examines a patient (collects and analyzes patient's complaints, anamnesis data, physical examination data, determines the necessary examination plan, evaluates parameters of laboratory, instrumental, pathological, anatomical and other research methods for disease diagnosis, assesses the prognosis (short-, medium-, long- term) of its course and outcomes;

PC-3.2 Formulates a preliminary and clinical diagnosis in accordance with the International Statistical Classification of Diseases and Health Related Problems X - XI revisions and current clinical classifications;

PC-3.3 Performs early and differential diagnosis of diseases;

PC-3.4 Routes and manages patients based on current legislation (standards, orders of medical care, Clinical Recommendations).

PC-5.2 Treats various categories of patients with diseases in outpatient, inpatient and high-tech medical care centers using drugs, medical devices and therapeutic nutrition, taking into account the clinical picture, in accordance with current procedures, standards of medical care, clinical recommendations (treatment protocols);

PC-7.2 Organizes and supervises immune prevention of infectious diseases in adult population in accordance with the current procedures of medical care, clinical recommendations (treatment protocols) on issues of medical care, taking into account the standards of medical care and determine medical indications

PC-7.4 Issues and sends to the territorial body of the Federal Service for Supervision of Consumer Rights Protection and Human Welfare an emergency notification in case of detection of the infectious or occupational disease and carry out anti-epidemic measures in case of a focus of infection, including quarantine measures in case of detection of particularly dangerous (quarantine) infectious diseases;

PC-8.1 Demonstrates ability and readiness to organize plan, report of medical staff work, to analyze performance indicators of medical institution and its subdivisions, to present analysis results;

PC-8.2. Maintains medical documentation, including in electronic form.

#### By the end of the course students must:

##### 3.1 know:

- specific features of the subject and objectives of Infectious Diseases course;
- the role, place and interrelations with other sciences in the system of biological and medical disciplines;
- the main historical stages of the development of Infectious Diseases;
- prospects of development and new directions in the study of infectious diseases;
- basic concepts of the discipline.
- the necessary list of medical documentation and general issues of medical care organization for infectious patients (adults and children);
- modern classification, etiology, epidemiology of infectious diseases;
- mechanisms of immunity and the state of the immune system in various infectious diseases;
- pathoanatomical changes in organs and tissues in infectious diseases;
- clinical symptomatology of infectious diseases, complications, outcomes
- clinical symptomatology of infectious diseases, complications, outcomes;
- modern classification, etiology, epidemiology of infectious diseases, principles of epidemiological analysis and anti-epidemic measures in the focus of infection.
- modern methods of treatment for infectious diseases (specific and pathogenetic therapy, basics of rational nutrition and diet therapy for infectious diseases;
- organization of follow-up for survivors;
- rehabilitation treatment after infectious diseases, indications and contraindications to spa treatment.

##### 3.2 be able to:

- to apply abstract thinking, analysis and synthesis in various types of professional and social activities;
- to draw up necessary medical documentation;
- to conduct a comprehensive clinical examination of the patient and to diagnose an infectious disease, the severity of the condition, emergency measures, the necessary additional examination (consultations of other specialists, laboratory and instrumental diagnostics);
- to determine the tactics of management of the patient, indications for hospitalization and isolation;
- to assign treatment of infectious patients, taking into account the etiology, severity of the disease and related pathological conditions;
- to conduct a comprehensive clinical examination of the patient and to diagnose an infectious disease, the severity of the condition, emergency measures, the necessary additional examination (consultations of other specialists, laboratory and instrumental diagnostics);
- to determine the tactics for the patient management, indications for hospitalization and isolation;
- to assign treatment of infectious patients, taking into account the etiology, severity of the disease and related pathological conditions;
- to perform differential diagnosis with the most common diseases
- to assign treatment of infectious patients, taking into account the etiology, severity of the disease and related pathological conditions;
- to determine the tactics for the patient management (to provide a full range of emergency medical care, or to start treatment and invite relevant specialists for consultation).

### 3.3 have skills of:

- the ability to operate with abstract categories, analyze, synthesize the information.
- proper documentation.
- methods of General clinical examination of patients;
- the algorithm of preliminary diagnosis, algorithm of the establishment of a detailed clinical diagnosis;
- the main medical diagnostic, treatment, rehabilitation and preventive actions for rendering medical care in the conditions of primary health care (emergency, urgent, planned), and also specialized medical care (emergency, urgent, planned).
- keeping medical records;
- the main medical diagnostic, treatment, rehabilitation and preventive actions for rendering medical care in the conditions of primary health care (emergency, urgent, planned), and also specialized medical care (emergency, urgent, planned);
- methodology of special tests results evaluation: bacteriological and virological, serological, ELISA, acid-base balance and blood gases, CSF, coproscopical examination, parasitemia of blood products
- the main medical diagnostic, treatment, rehabilitation and preventive actions for rendering medical care in the conditions of primary health care (emergency, urgent, planned), and also specialized medical care (emergency, urgent, planned).

#### 4. STRUCTURE AND CONTENTS OF THE COURSE (MODULE)

## 6. COURSE (MODULE) RESOURCES

### 6.1. Recommended Literature

#### 6.1.1. Core

Code	Authors	Title	Publish., year	Quantity
Л1.1	N.D. Yushchuk, Yu. Ya. Vengerov.	Infectious diseases: textbook : иностранный язык в профессиональной сфере	Moscow: GEOTAR -Media, 2020, Electronic resource	40

#### 6.1.2. Supplementary

Code	Authors	Title	Publish., year	Quantity
Л2.1	Yushchuk N.D., Vengerov Yu.Ya.	Infectious diseases: textbook	Moscow: GEOTAR -Media, 2020, Electronic resource	1

#### 6.1.3. Methodical development

Code	Authors	Title	Publish., year	Quantity
Л3.1	Ilyinskikh E. N., Semenova A. V., Boginskaya P. V.,	Infectious diseases of digestive and respiratory tracts. Collection of case studies: tutorial	Electronic resource	1

### 6.2. Internet resources

E1	Doctor
E2	Clinical laboratory diagnosis
E3	Attending doctor. Magazine
E4	Clinical Microbiology and Antimicrobial Chemotherapy
E5	Virology issues
E6	Epidemiology and vaccine prevention. Magazine
E7	Epidemiology and Infectious Diseases
E8	Infectious diseases. Magazine
E9	Infections and antimicrobial therapy. Magazine
E10	Clinical medicine
E11	Russian Medical Journal

#### 6.3.1 Software

6.3.1.1	Operational system Microsoft, applied programs pack Microsoft Office
6.3.1.2	Internet access (Wi-Fi)

#### 6.3.2 Information Referral systems

6.3.2.1	E-data bases: RSL, Orbicon, Medline.
6.3.2.2	Student Consultant <a href="http://www.studmedlib.ru">http://www.studmedlib.ru</a>

#### **7. MATERIAL AND TECHNICAL SUPPORT OF DISCIPLINE (MODULE)**

A classroom for conducting lecture-type classes at SurSU. The lecture hall is equipped with a multimedia projector, a screen, a laptop, a stationary chalkboard, standard educational furniture: tables, chairs.

Practical classes, individual consultations, ongoing monitoring and intermediate certification are conducted in the classroom at the Surgut District Clinical Hospital (Infectious Diseases Building). The classroom is equipped with: a laptop, a digital SLR camera, personal computers, a stethophonendoscope, a mechanical blood pressure measuring device. Visual aids and technical training tools: tables and microtables. A set of presentation materials. Videos. Test questions and tasks by topic. It is equipped with standard educational furniture: tables, chairs.
